SUMMARY

Full Stack Developer with 4+ years of experience building scalable, secure web applications using Python, JavaScript/TypeScript, React.js, Node.js, SQL, and AWS. Skilled in designing ETL pipelines, RESTful APIs, microservices, and enterprise dashboards (Power BI, Tableau) to optimize workflows, enhance operational efficiency, and deliver actionable insights. Experienced in ERP integrations (SAP, Oracle, Microsoft Dynamics), Agile collaboration, and mentoring teams, combining technical expertise with strong problem-solving and cross-functional communication to drive business outcomes.

SKILLS

Programming & Backend: Python, JavaScript (ES6+), TypeScript, Node.js, SQL, Object-Oriented Programming, Data Processing, ETL Pipelines, Automation Scripts, Predictive Logic, Applied Machine Learning

Frontend & Visualization: React.js, HTML5, CSS3, Responsive UI Design, Power BI, Tableau, Data Visualization, KPI-Driven Dashboards

Backend APIs & Services: RESTful APIs, API Integration, Microservices, Service-Oriented Architecture, Secure Data Handling, Input Validation, Unit & Integration Testing (Jest, React Testing Library)

Databases & Data Management: PostgreSQL, MySQL, Oracle Database, Relational Data Modeling, Query Optimization, Inventory & Order Data Systems

Cloud & DevOps: AWS (EC2, S3, RDS, Lambda/Serverless), CI/CD Pipelines, Docker, Application Logging & Monitoring, Git/GitHub, Process Automation, Agile & Scrum Methodologies

Enterprise Systems & Integrations: SAP, Oracle ERP, Microsoft Dynamics, NetSuite, Electronic Data Interchange (EDI), Order Processing Platforms

AI & Analytics: Predictive Modeling, Feature Engineering, Model Evaluation Metrics, scikit-learn

PROFESSIONAL EXPERIENCE

Full Stack Developer, Fidelity Investments | USA

Jan 2025 - Present

- Developed enterprise web applications using Python, React.js, and TypeScript, supporting investment operations and client-facing financial platforms across multiple business units and enabling 10,000+ daily user interactions and transactions.
- Designed ETL pipelines and applied SQL and relational data modeling to consolidate trade, account, and reference data from multiple sources, improving query performance and enabling near real-time financial reporting.
- Implemented RESTful APIs and microservices integrating internal investment systems and third-party data providers, improving cross-team data accessibility and reducing manual reconciliation efforts by 1,500+ hours annually across Oracle and PostgreSQL databases.
- Built Power BI and Tableau dashboards to track operational KPIs, investment processing metrics, and predictive trends, reducing issue resolution time by 20% and improving data-driven decision-making for business stakeholders.
- Collaborated with Agile/Scrum teams, mentoring junior developers, facilitating technical knowledge sharing, and ensuring timely delivery of high-quality features while maintaining strong engineering productivity.

Full Stack Developer, Mastercard | India

Jun 2020 – Jul 2023

- Developed secure transaction applications using Python, Node.js, and React.js, supporting 40,000+ daily financial transactions and improving reconciliation efficiency across domestic and international payment systems.
- Created backend services and API integrations for enterprise financial platforms, ensuring PCI-compliant data handling and reducing failed transactions by 12,000 monthly across MySQL and Oracle databases.
- Optimized database queries and relational models across PostgreSQL and MySQL, improving dashboard load times by 35% and enhancing reporting accuracy for compliance monitoring.
- Built predictive analytics modules using scikit-learn to detect anomalies and forecast transaction trends, supporting fraud detection initiatives and risk management decisions.
- Implemented unit and integration testing frameworks (Jest, React Testing Library) for microservices, reducing post-deployment defects by 25% and improving platform reliability.
- Delivered cross-functional Power BI and Tableau dashboards for operations and compliance, enabling faster insights, enhanced collaboration, and improved SLA adherence.
- Coordinated Agile/Scrum ceremonies with product managers and QA teams, mentoring peers and fostering collaborative development practices across the engineering team.

EDUCATION

Master of Science in Information Systems

Trine University, Detroit, MI, USA

Aug 2023 - May 2025

Bachelor of Computer Science Engineering

Malla Reddy Engineering College, Hyderabad, India

Jun 2018 – Jun 2022

CERTIFICATIONS

- AWS Certified Developer – Associate
- Microsoft Power BI Data Analyst Associate
